

Grading Student Work During Remote Learning

The goal of Pleasant Valley is to ensure that:

- all of our students have opportunities for continued learning that focuses on critical standards
- we minimize instructional loss
- students and families are given routines and structures to ensure they stay connected to schools and learning

Therefore, during the mandated school closure, student assignments will be counted as complete or incomplete. Teachers will work to provide feedback to students when appropriate. Assignments completed during this time will not negatively affect a student's standing for grade promotion.

You will NOT see any new assignments or grades entered into Teacherease while we are providing remote learning opportunities.

Information regarding promotion, retention, and summer school will be provided when we have more guidance from the state concerning the length of the mandated school closure.
